

# Jonathan H. Huggins

---

## CONTACT INFORMATION

MIT, Stata Center, Room G451   ✉ jhuggins -at- mit -dot- edu  
32 Vassar Street                   🌐 jhhuggins.org  
Cambridge, MA 02139 USA

## RESEARCH INTERESTS

large-scale learning, inference algorithms for rich model classes (e.g., Bayesian nonparametric models, probabilistic program), interface between learning and inference.

## EDUCATION

**Massachusetts Institute of Technology**, Cambridge, MA USA

Ph.D. Student, Computer Science, September 2012 - present

- Dissertation Topic: Scalable Bayesian inference using adaptive data summaries
- Advisor: Tamara Broderick

S.M., Computer Science, June 2014 (GPA: 5.00)

- Advisor: Joshua B. Tenenbaum
- Selected coursework: Advanced Algorithms, Probability Theory, Inference and Information Theory

**Columbia University, Columbia College**, New York, NY USA

B.A., Mathematics, May 2012 (GPA: 4.04)

- Research Advisors: Liam Paninski and Frank D. Wood
- Selected coursework: Machine Learning, Computational Learning Theory, Probability Theory, Real Analysis, Graph Theory

## GRANTS, HONORS, AND AWARDS

ISBA@NIPS travel award (2016)  
DoD National Defense Science and Engineering Graduate Fellowship (2013-2015)  
NSF Graduate Research Fellowship (2013) (*declined for DoD NDSEG*)  
Hertz Fellowship Finalist (2013)  
Summa Cum Laude, Columbia University (2012)  
Phi Beta Kappa (2011)  
Rabi Scholar, Columbia College (2008-2012)  
Intel Science Talent Search Finalist (2008)

## ACADEMIC EXPERIENCE

**Massachusetts Institute of Technology**, Cambridge, MA USA

*Graduate Student* **September 2012 - present**

*Teaching Assistant* **September 2016 - present**  
Held office hours, conducted recitation sessions, graded homework, and advised students on class projects for graduate-level machine learning courses (6.862 and 6.867).

**Columbia University, Columbia College**, New York, NY USA

*Undergraduate Researcher* **June 2011 - May 2012**  
Conducted independent research in statistics for neuroscience (advisor: Liam Paninski) and Bayesian nonparametric modeling (advisor: Frank Wood).

*Teaching Assistant* **June 2011 - May 2012**  
Duties included office hours and grading of homework for introductory statistics and data structures courses.

## PREPRINTS

PROFESSIONAL  
SERVICE

Journal Reviewer:

- PLoS One

Conference Reviewer:

- Advances in Neural Information Processing Systems, 2011-present
- International Conference on Machine Learning, 2015-present
- Artificial Intelligence and Statistics, 2016-present

PROFESSIONAL  
EXPERIENCE

**Google Inc.**, New York, NY USA

*Summer Engineering Intern*

**May, 2012 - August, 2012**

Developed, created, and deployed a language-model based “gibberish detector” for identifying short text sequences as nonsensical.

**MITRE Corp.**, Bedford, MA USA

*Technical Co-op*

**May 2007 - August 2009**

Worked with multiple teams on natural language processing problems such as co-reference finding, action recognition in free text, and named entity recognition. Projects were implemented in OCaml, Python, and Perl and used techniques such as integer linear programming and conditional random fields.
